EXPERTS IN
PACKAGED PUMP STATIONS

— SINCE 1991 —

The Beck Water CSM Packaged Pump Station is more than a collection of pumps, pipes, and concrete — it is a complete risk-reduction and compliance solution engineered for municipal networks, subdivision developments, and civil projects.

Beck Water bridges the gap between design, construction, operations, and long-term asset performance.

FOR MUNICIPAL TEAMS, THIS MEANS
SAFER OPERATION.

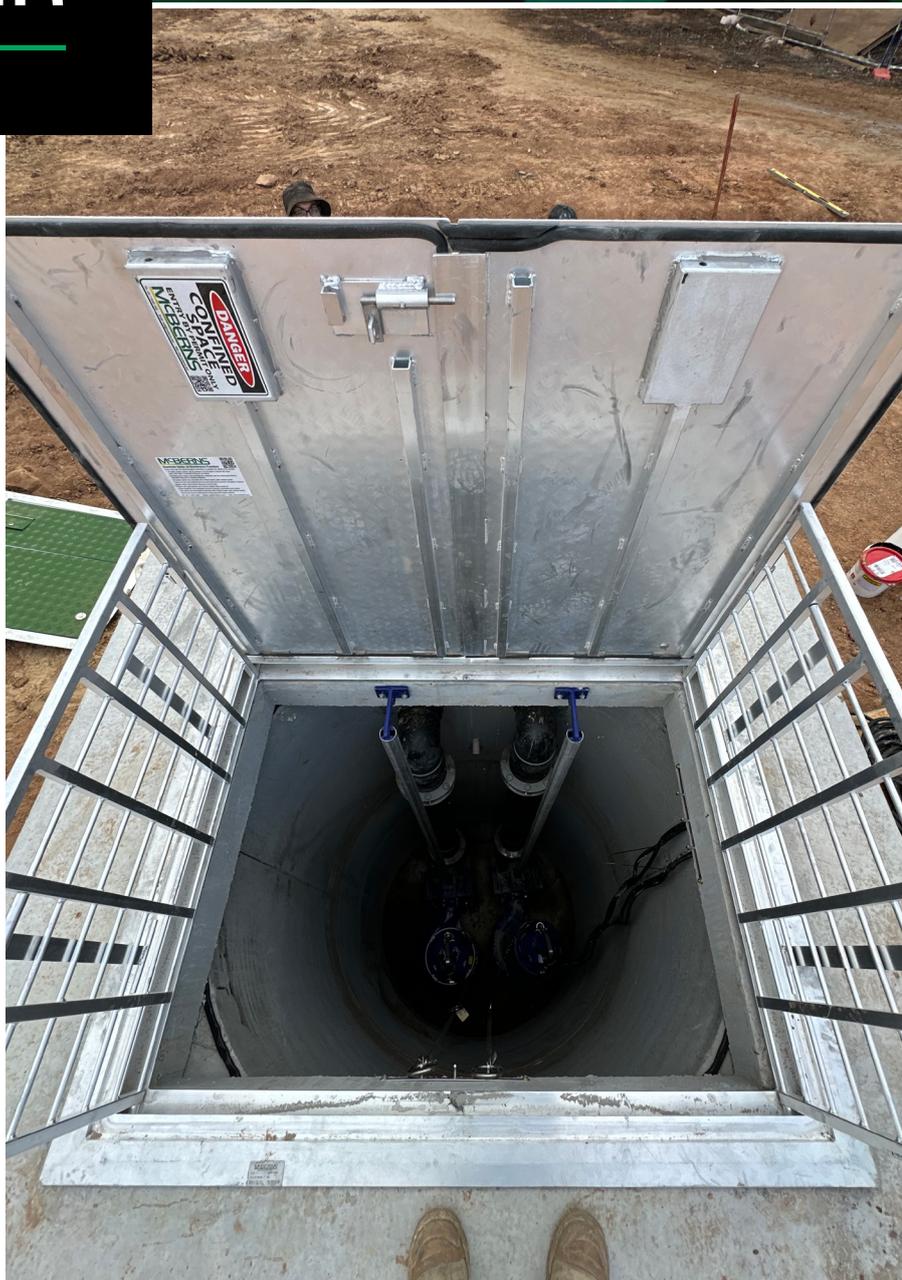

FOR CONTRACTORS, IT MEANS
COMPLIANT INSTALLS.

FOR DEVELOPERS, IT ENSURES
**ACCEPTANCE AND A
SMOOTH HANDOVER.**

ABOUT BECK WATER

At Beck Water, we design and deliver industry-leading packaged pump station solutions. With a strong focus on safety, compliance, and technical accuracy, we help our customers reduce project risk, improve operational reliability, and deliver wastewater infrastructure that meets today's standards and tomorrow's demands.

PRODUCT OVERVIEW

BECK WATER CSM PACKAGED PUMP STATION

The Beck Water CSM Packaged Pump Station is a fully prefabricated, council-compliant wastewater solution. Each unit comes complete with the concrete chamber, pumps, valve gear, pipework, safety systems, and access covers — all preassembled and ready to install.

Designed for developers, contractors, and councils, the CSM system reduces site time, removes installation risk, and delivers long-term reliability with proven pumps and durable construction.

Diameter	Max Depth
1800mm	8.0m
2200mm	15.0m
3000mm	15.0m
3600mm	15.0m

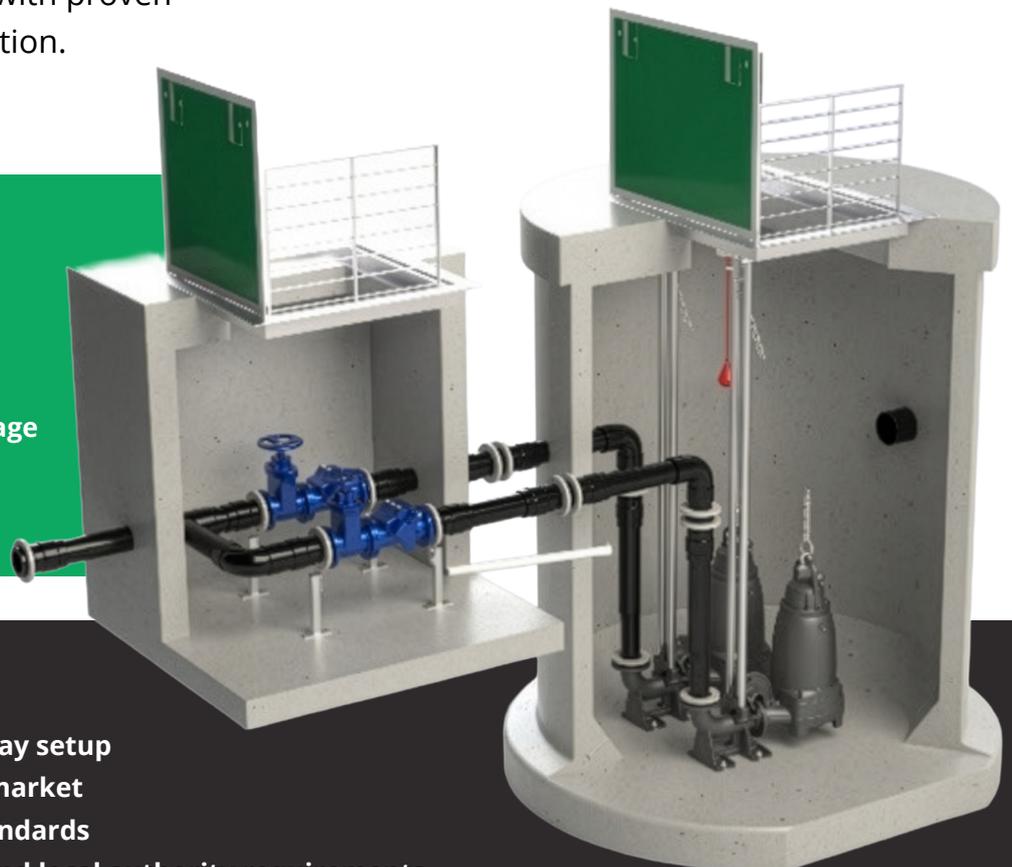

APPLICATIONS:

- Residential subdivisions
- Industrial estates
- Caravan parks and resorts
- Municipal stormwater drainage
- Emergency bypass or temporary pump setups

BENEFITS:

- ✓ Quick installation – plug & play setup
- ✓ Safest Pump station on the market
- ✓ Engineered to Australian Standards
- ✓ Fully compliant with WSAA and local authority requirements
- ✓ Customisable to site-specific needs
- ✓ Backed by Beck Water's expert service and support

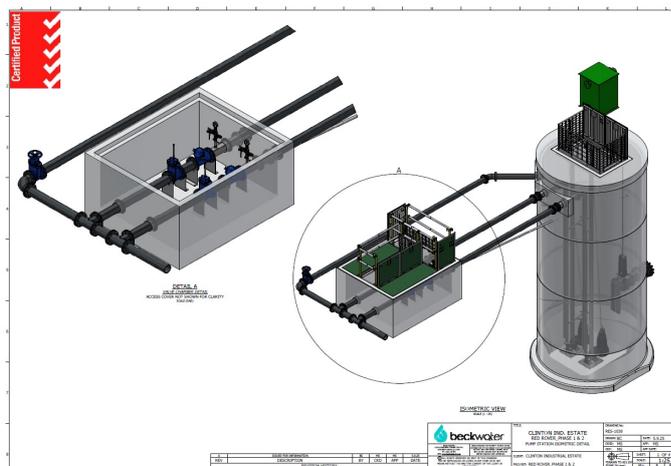

DESIGN & INSTALLATION SUPPORT

Beck Water supports your project from estimating through to final delivery, ensuring every pump station is accurate, compliant, and simple to install.

WE PROVIDE:

- Fast, accurate scoping and tender support
- Site-specific CAD drawings and engineering submittals
- Technical guidance and compliance documentation
- Clear installation requirements and prestart information
- Delivery scheduling, onsite coordination, and offloading assistance
- Commissioning support and operator training

Designed around the needs of contractors, developers, consultants, and councils, our process reduces risk, cuts complexity, and keeps your project moving.

WHY CHOOSE BECK WATER?

— DECADES OF EXPERIENCE IN WATER INFRASTRUCTURE —

Beck Water is trusted by councils, developers, and engineers for:

AUSTRALIAN-MADE QUALITY
FASTER APPROVALS AND LEAD TIMES
FLEXIBLE CONFIGURATIONS
DEDICATED PROJECT SUPPORT

We don't just supply equipment — we deliver complete solutions that meet regulatory requirements, reduce long-term costs, and improve infrastructure resilience.

Engineered for performance.
Delivered with confidence.
